## ManageNet Errors During Program Launch

---

### PROBLEM

When installing ManageNet the final step in the installation procedure allows the program to be launched. If the ManageNet program is launched by the installation program in this manner, it may not be able to find some of its files, and will display a series of error messages.

### SOLUTION

To avoid this problem, make sure the Launch ManageNet checkbox is clear (unchecked) before concluding the installation. The program may then be launched from the Windows Start menu, and will function properly.
