Probe Color Change/New Thread Leads

PROBLEM

Beta's standard blue probe 018079 (099466 in kits) is a little difficult to assemble.

SOLUTION

1. A thread lead has been added, so the nut matches up with the probe body threads easier, reducing crossthreading.
2. The nut has been made slightly larger, so it screws on easier.
3. The probe color has been changed to orange to differentiate it from the old probe. The item number has not changed.

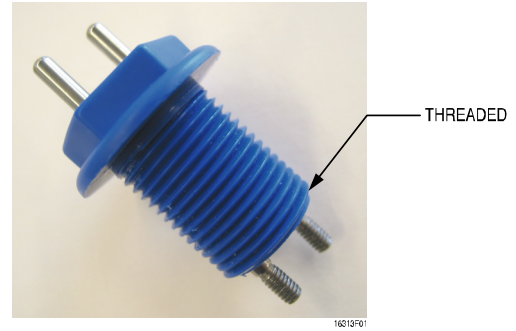

Figure 1. Old blue probe #018079 with threads all the way to the bottom.

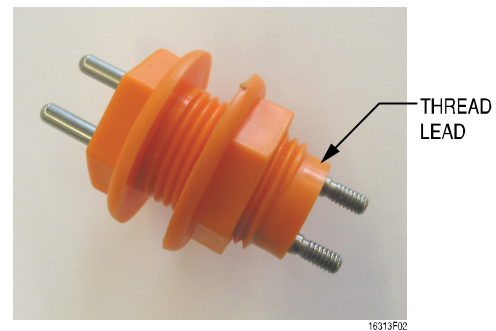

Figure 2. New orange probe #018079 with thread lead and larger nut.
