

W-6000

Dry Detergent Reservoir

Tough and solid all around for a dispenser!

Beta Technology's W-6000 is a rugged, glass-filled polypropylene reservoir for dispensing encapsulated cleaning products. It will accept any typical six inch diameter plastic bottle. The open top design allows even the tallest bottles to fit easily into the W-6000, and a strategically located spray nozzle virtually guarantees total product wash-out.

The W-6000 incorporates a spring-loaded spray deflector which slides over the spray nozzle whenever a bottle is removed. This effectively prevents the operator from being sprayed when changing bottles.

When the water supply is on, an even, unobstructed spray contacts the contents of the bottle. As the chemical liquifies, it runs to the bottom of the bowl where it drains out.

Pays for Itself

- Fast installation
- Positive mechanical deflector prevents water spray during bottle changing
- Maximum wash-out for cost effective dispensing
- Durable, glass-filled polypropylene construction

SPECIFICATIONS

SIZE

Height: 9.5 in / 24.13 cm

Width: 7.0 in / 17.78 cm

Depth: 9.6 in / 24.38 cm

Weight: 3 lb / 1.36 kg

HOUSING

Glass-filled polypropylene

MOUNTING

Wall-mounted, two upper keyhole slot and two lower screw holes

COLOR

Available in gray

BOTTLE KEY

To ensure that the correct product is used in an application, a key is available. It attaches to the dispenser and effectively locks out all but properly-shaped bottles.

HOW TO ORDER

Code #	Description
040529	W-6000 gray bowl w/84 degree spray nozzle
040535	W-6000 gray bowl w/50 degree spray nozzle
040538	W-6000 gray bowl w/slow-feed nozzle
