Read and understand the label and Safety Data Sheet (SDS). These provide a description of hazards, precautions, personal protective equipment, first aid, 24 Hour Emergency lines, storage data and other safe handling information. The SDS is provided with each container shipped. It is also available on our website or from the distributor.

PRODUCT DIRECTIONS

EQUIPMENT TO USE

Dust mop, spray bottle, buffing equipment, wet floor signs.

DIRECTIONS TO USE

1. Remove gross soil such as heavy tar, paper, gum, etc., and then dust mop.
2. Using a spray bottle, spray two or three full sprays on an area about four feet by six feet. DO NOT OVERWET.
3. With a nylon or polyester spray buff pad (a red pad works best in most cases), make one pass with floor machine to spread out the product. Then return and buff to gloss (generally two passes). Flip or change pad as necessary.
4. After buffing is completed, dust mop floor if dust is present.

FLOOR PREPARATION:

1. If floor shows uneven wear, heavy build-up, or deep ground-in dirt, floor should be stripped.
2. Apply three base coats of finish before using GX-1500. To obtain the maximum level of gloss, a substantial floor finish base is required. Three coats of finish are recommended.
3. Heavy traffic areas may occasionally require additional floor finish to maintain an adequate base. When recoating is necessary, simply clean floor and apply finish directly over GX-1500.

NOTE: Floors will be slippery when wet or contaminated with foreign materials. Promptly clean up spills and foreign materials.
