

Liquid Laundry Size

A Liquid Sizing for Institutional Laundry

Liquid Laundry Size is a synthetic sizing that is utilized during the final rinse. It adds body to polyester and cotton/polyester table linens and napkins. Linens must be thoroughly cleaned during prior wash cycles, as oily soils reduce the efficiency of the sizing. It is essential that this product be used as directed, as misuse may cause a sizing buildup in the linens.

Specifications

Color	White
Scent/Odor	Citrus
Character	Opaque, viscous liquid
Foam	Non-foamer
pH Use Dilution	5.5 - 6.5
Phosphorus Content	0.0%
Approvals	cRc
Water Temperature	All

Pack Sizes

4373904	5 gallon pail
----------------	---------------

Directions For Use

Equipment: Recommended automatic liquid laundry injection system.

Use Dilution: 3-5 ounces per 50 pounds of fabric.

1. Pre-sort laundry prior to wash.
2. Pre-soak and/or pre-spot laundry when necessary.
3. Place proper amount of soiled fabric into laundry machine.
4. In wash cycle, feed Liquid Laundry Break and Liquid Laundry Suds or feed Combo® directly from shipping container.
5. When bleaching, feed Liquid Laundry Destainer into the laundry machine.

6. When souring, feed Liquid Sour & Rust Remover into the laundry machine. Works best in the final rinse cycle. A final pH of 5.5-6.5 is recommended for the fabric.
7. Add 3-5 ounces of Liquid Laundry Size per 50 pounds of fabric to the machine at the beginning of the final rinse cycle. Be sure to allow the machine to fill with water before adding the product. Liquid Laundry Size should be in contact with the fabric for 3-5 minutes. Water temperatures should be 90°-110°F for best results.

NOTE: DO NOT FREEZE.

*This product can be used in all water temperatures. Your chemical specialist will adjust product concentrations based on results.
