HAND WASH DISPENSING SYSTEM

Indulgence

FEATURES & BENEFITS

✓ Unique Push-Pad Placement and ADA Compliance

Indulgence™ manual dispensers feature a large, easy-to-use push pad located at the top of the dispenser. This placement allows the user to see the amount of foam being dispensed into the hand, reducing waste caused by over-dispensing product. The dispensers are also ADA compliant, requiring one hand and less than five pounds of pressure to dispense product.

✓ Automatic Dispenser

The Indulgence™ hands-free dispensing system reduces cross contamination in restrooms and makes hand washing more effective. Foaming hand soap dispenses as soon as a hand is placed under the sensor. Water-drop indicator lights up green when activated and red when batteries are low. Sleep mode is activated after 30 minutes of non-use, extending battery life.

✓ Economical to Use

Each dispenser delivers 0.75 mL of rich foam per pump versus 1.5 mL per pump for most bag-in-box liquid systems. Using one dose per hand washing, Indulgence™ will provide twice the number of hand washings per 1000 mL bag.

✓ Attractive, Innovative Dispenser Design

The Indulgence™ dispensers feature smooth, contemporary lines, and a textured, non-glare surface, durable ABS plastic and a footprint that is similar to other bag-in-box dispensers. The large view window makes it simple to monitor the product level.

✓ Locking Option

For added security, Indulgence™ dispensers feature a locking option. Dispensers are shipped in the manual mode but are easily converted to the keyed locking option.

✓ Guaranteed Leakproof

By placing the dispenser pump at the top of the dispenser rather than the bottom, the risk of leaking at the valve is eliminated.

✓ Convenient Labeling

Indulgence™ products are available in convenient 4 pack cases. Each case and product bag are individually labeled in English and Spanish.
