# LESS SERVICE = BETTER RESULTS

By design, ChemLogic uses digital technology for dependable, highly accurate and consistent dispensing. Additionally, it is a powerful tool that provides technicians and end users with critical information to maximize results. This winning combination, less service and better results, significantly lowers the cost of service and greatly increases your value to the customer.

## FEATURES & BENEFITS:

- Safety chemical lockout feature prevents incompatible products, such as bleach and sour, from ever pumping together
- Bilingual display in either English, Spanish, or both
- Easy-to-read display on new control head
- Chemical prime capability can be deactivated if appropriate
- Low cost means improved margins
- Compact design with built-in flush manifold
- Hassle-free installation cuts time in half
- Accurate, consistent dosing
- Unit is pre-wired for easy installation
- No squeeze tubes means no regular maintenance

## INSTALLATION:

- Convenient telephone style plug-in connectors
- Easy-mount control head and isolation module

## PROGRAMMING:

- Simple and intuitive programming with 32-formula capacity
- 28 preloaded formula names, in both English and Spanish
- Enter additional formula names easily as needed
- Memory holds during power interruption
- Password protected software

## DATA:

- Data collection capability
- Create customer reports for each account
